UST

Shyma Paul

Developer I – Software Engineering

Mob:8304991033 | Email: Shyma.Paul@ust.com | UID: 249387

Key Skills

- Java
- Spring Boot
- HTML, CSS, Bootstrap
- JavaScript
- MySQL
- Python
- C, C++
- React

Internships and Projects

- Website For Event Management
- Network Intrusion Detection System Using LSTCM

Certifications

- Master Java Web Service and Rest API with Spring Boot (IIHT)
- Python Programming

Notable Accomplishments

- Participated and won prizes in Algorythm - 2021

Professional Summary

I recently received my Master's in Computer Applications, and finished my six-month bootcamp training at UST. I am a flexible and goal-oriented software developer with great expertise in a wide range of technologies, including Java, MySQL, Python, HTML, React, CSS, and Spring Boot. I'm a highly motivated person that thrives on taking on new challenges and opportunity to develop my talents. I'm a good learner since I can rapidly pick up new concepts and I'm always eager to begin new initiatives. I'm enthusiastic to contribute my knowledge because I have a track record of successfully overcoming difficult problems and a collaborative approach.

Academic Profile

Master of Computer Applications

University: APJ Abdul Kalam Technological University

CGPA: 8.53

Work experience

Developer I – Software Engineering

Successfully finished a rigorous 6-month training course in Java Full-Stack Development at UST. Throughout the course of the program, I received useful hands-on experience in back-end frameworks like Spring Boot and MySQL as well as front-end technologies like HTML, CSS, React, and Java Script. I improved my problem-solving and teamwork skills by working productively with my team to create high-quality solutions on time for projects. I have a solid track record, which includes actively engaging in a three-week Hackathon.
